ARTICLE XII. SEISMIC HAZARD IDENTIFICATION AND MITIGATION PROGRAM FOR UNREINFORCED MASONRY BUILDINGS*

Sec. 7-501. Purpose.

It is generally acknowledged that the City of Belmont is located in a geographic area of high seismic risk, due to its proximity to both the San Andreas and Hayward faults, and may reasonably be expected to experience moderate to severe ground shaking in the event of a significant local earthquake. Such ground shaking could result in serious injury or loss of life due to damage or collapse of buildings. Historically, unreinforced masonry buildings have been shown to be especially vulnerable. The purpose of this article is to promote public safety by identifying those buildings in the City of Belmont which exhibit structural deficiencies in their capacities for earthquake resistance, and by determining the severity and extent of those deficiencies in relation to their potential for causing injury or loss of life. (Ord. No. 823, § 1, 1-9-90)

Sec. 7-502. Definitions.

For purposes of this article the following definitions apply:

(a) *Civil engineer or structural engineer* means a licensed civil or structural engineer registered by the State of California pursuant to the rules and regulations of title 16, chapter 5 of the California Administrative Code.

***Editor's note**—Ord. No. 823, adopted Jan. 9, 1990, effective Feb. 8, 1990, did not specifically amend this Code; hence, inclusion of §§ 1–13 as ch. 7, art. XII, §§ 7-501–7-513, was at the discretion of the editor. The word "ordinance" has been changed to "article."
